

Protect your fertilizer investment

UAN makes a great foundation for your fertility plan. It's versatile. It's efficient. It goes down easily. But like all fertilizers, it's susceptible to losses.

Protect your UAN investment from nitrogen loss by mixing in a nitrogen stabilizer like TRIBUNE®. It features dual-action ingredients to prevent all three forms of N loss, pairing NBPT with Pronitridine, which extends protection up to three times longer than without an inhibitor.

Where are you losing N?

TRIBUNE's active ingredients prevent N loss both above and below the ground, and trial results show this has an impact on yield. In Koch trials, fields treated with UAN + TRIBUNE outyielded fields treated with UAN only.

Take this opportunity to protect your fertilizer investment.

For a limited time only, Cargill is offering a \$0.50/litre discount on TRIBUNE.

Receive an additional \$0.50/L off when you pre-pay.

***Offer available October 15 - November 30, 2024.**

*TRIBUNE application rate is 9.46 L per MT of UAN.

TRIBUNE® is a trademark of Koch Agronomic Services, LLC. Offer available while quantities last.
