Pacer Ultra

Pacer Ultra is a contract that builds an enhanced average by pricing grain every day at market close or your floor price, whichever is higher.

Simplify grain marketing. Build a price and protect against volatility.

Price

Enhance

Pacer Ultra

Use Pacer Ultra when you would like to:

- Build an enhanced average - participate in market upside with the security of a floor price.
- Participate in seasonal averages prior to harvest delivery.
- Forward sell your production to take advantage of potential market rallies.

Advantages of Pacer Ultra:

- Downside protection at the Floor Price.
- Unlimited upside participation above the Floor Price.
- Price out any time during pricing period.

How Pacer Ultra Works.

Pacer Ultra prices an equal portion of grain daily using the market close or your floor price, whichever is higher.

For example:

- Floor price (Referencing November Futures) = **$710**
- Initial Cost: **$25**
- Minimum Potential Price Before Basis Adjustment = **$710 - $25 = $685**
